## 1. About This Package

This free package contains 5 modular male characters designed for modern city environments. The characters are fully rigged, compatible with Mixamo animations, and skinned, with modular clothing that can be used directly inside Unity projects.

This pack was created using the CharCrafter - Modular Stylized Character Creator tool. All assets are standalone and ready for use in your own projects.

## 2. Package Content

- 5 fully rigged male characters:
  - Doctor
  - Athlete
  - Casual Urban
  - Delivery Worker
  - Office Worker
- Skinned meshes with modular clothing parts
- Prefabs ready for placement inside Unity
- Fully compatible with Mixamo humanoid animations

## 3. Render Pipeline Compatibility

This package was originally created for Unity's Universal Render Pipeline (URP).

If you are using HDRP or Built-In Render Pipeline, you may need to manually reassign shaders and materials to fit your target pipeline.

Currently, automatic pipeline conversion is not provided inside this free package.

#### **4. Related Tool - CharCrafter**

All characters in this pack were created using my modular character creation tool:

CharCrafter - Modular Stylized Character Creator

<https://assetstore.unity.com/packages/slug/322207>

This tool allows you to fully customize characters, clothing, accessories, and more.

#### **5. Unity Version Compatibility**

- Developed and tested with Unity 6000.0.29f1 (Unity 6)
- Compatible with Unity 6000.0 and newer versions
